MECHANICAL SUPPORT – TAILORED, FLEXIBLE SOLUTIONS

ASL has a dedicated and experienced team which has developed and grown from its day-to-day in-house and partnered repair activities. We have an extensive range of capabilities over a multitude of platforms. We offer solutions tailored to customers' requirements, offering complete flexibility to reduce costs and turnaround times.

Encompassing fabrication, machining, surface preparation, localised surface treatments, surface finishing, assembly and test, we serve some of the most innovative, technology driven global companies across a variety of market sectors.

We provide integrated solutions for the critical spares management service to the Defence, Aviation and Mass Transit industries. We offer the same level of service to defence operations as that expected by civil aviation markets in terms of component, repair and overhaul. The demands of our Mass Transit customers are treated as an AOG Support service.

With quality and price being the key objective, we are proud to include many global end-users and operators as part of our customer base.

ADDED VALUE THROUGH EFFICIENCY

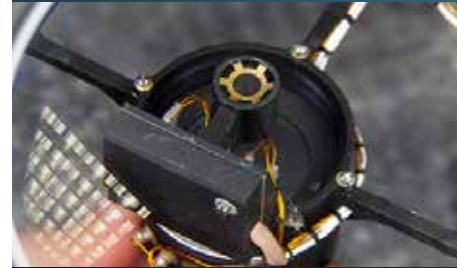

Our critical spares management system has been developed over the past 40 years. This has enabled greater efficiency and cost savings up and down the supply chain as a whole. These important advances have enabled both suppliers and customers to achieve added value through production cost savings and low administration cost with key assets in service.

This versatile and fully integrated approach allows us to continually react to procurement policies, within the commercial, military and defence sectors and to react to our customers' ever changing needs.

At ASL, we offer in-house support for many items, with the anticipation of expanding our rotary product types through recent strategic programme agreements and sustained investment, thus enhancing our in-house offerings.

In-house capabilities

- / Pneumatic components and assemblies
- / Fuel system components and assemblies
- / Landing Gear and associated equipment
- / Engine Components
- / Hydraulic equipment
- / Engine accessories
- / Wheels and Brakes
- / Surface Preparation
- / Surface Finishing
- / Fabrication
- / Machining
- / Welding

REPAIR AND OVERHAUL MANAGEMENT

With over 40 years of repairing aircraft components, we have built comprehensive partnered relationships with OEM approved and repair vendors. We are able to deliver a range of repair solutions, which in turn reduces administrative burdens and ultimately a reduction in turnaround times, keeping your assets operational.

WHO WE WORK WITH

AEROSPACE ENGINEERING SOLUTIONS

We have many years of experience providing aerospace engineering solutions for specific project requirements. This level of expertise allows us to offer 'fast turnaround' engineering services for small to medium size batch production, prototype and development, testing and inspection, tooling and a full range of machine shop processes.

QUALITY MANAGEMENT

With ASL's drive to enhance systems and processes our approval to EN9110 and AS9100 gives customers piece of mind when utilising our engineering services.

ABOUT ASL

ASL has been established for over 40 years, we have Head Offices in Horsham, United Kingdom and together with our international offices we serve our global customers in the Middle East, Asia, Oceania, United States, Europe and South America. With over 80,000 sq.ft. of warehousing for our 350,000 lines of stocked components, we provide an integrated approach to total platform support.

Many years of experience supplying, stocking and repairing equipment and components has resulted in superior levels of industry and product knowledge. Our dedicated team are ready to rapidly respond to ensure through-life support for all your requirements, regardless of size.

66

AN INTEGRATED APPROACH TO TOTAL PLATFORM SUPPORT WHETHER YOU ARE AN OPERATOR, END USER, MAINTENANCE ORGANISATION OR CONTRACT HOLDER WITHIN THE AEROSPACE, DEFENCE, MARINE OR MASS TRANSIT MARKET SECTORS
