

ASL

/ ABOUT ASL

/ SERVING COMMERCIAL AND MILITARY ORGANISATIONS

ASL are experts in supplying, sourcing and repairing equipment and components – ensuring your assets continue to remain operational at all times. ASL's dedicated team of industry professionals have a unique blend of expertise and knowledge.

We have over 100,000 sq.ft of fully stocked warehousing comprising over 500,000 lines of components, with many millions more available through our global supply chain network. We serve operators, end-users, maintenance organisations and contract holders from international offices around the globe and our head office in the United Kingdom.

Fully qualified and accredited to support all of your mechanical and electronic repair requirements, we repair, overhaul, re-certify and manufacture, to approved standards, components and assemblies across a multitude of platforms, delivering a diverse range of repair solutions.

Our experience at ASL affords us the ability to identify obsolescence risk at the earliest stage and then mitigate the risk with our extensive stock and customised obsolescence management programme.

/ QUALITY APPROVALS

We continually strive to enhance our systems and processes.
The following certifications are testament to our quality management.

AS 9100

ISO 9001

AS 9110

AS 9120

ISO 14001

/ ASSOCIATIONS

/ CAPABILITIES

/ AIR

Our expertise is understanding your aerospace requirements – supplying, sourcing and repairing a diverse range of aviation equipment and components ensuring serviceability of your platform. Our heritage began as a supplier and stockist of ex-UK MoD surplus equipment and components. Over the years we have developed and strengthened our services, priding ourselves on a breadth of industry experience and providing engineering solutions for our global customers.

/ SEA

We provide multi-faceted solutions to the marine industry, assisting customers to maintain fleet equipment to 'end of life'. Our depth of engineering services is well supported with the traditional supply of spares and components and the repair of electrical, electronic components and navigational equipment. We supply and service steering and control equipment, radar, sonar, engine, actuators and automated systems/associated parts to the military and offshore industries.

/ LAND

Whatever the requirement, from military vehicles to mass transit, ASL have previously met challenges to repair a variety of equipment from braking control systems, complete gearboxes, mechanical assemblies, hydraulic components, wheel slide protection, engine and power management systems. We supply a wide range of equipment and components from our in-house inventory and offer repair support services to fit around your diverse needs.

/ WHAT WE DO

/ COMPONENT SUPPLY

With vast industry experience in supplying and sourcing parts and components, we provide tailored solutions for our customers everyday critical requirements.

SOURCING THE IMPOSSIBLE

With the foresight that comes from our wealth of experience, we are dedicated to establishing the future needs of the market and ultimately the requirements of our customers, with the pursuit of a proactive stock availability strategy.

We will continue to follow a strategy of purchasing and locating the 'impossible to source' parts, components, assemblies and specialist equipment for our Air, Sea and Land customers.

Utilising ASL as a single point of contact in the supply chain for all procurement and spares provisioning helps reduce administrative burdens and financial constraints and provides prompt pricing and availability for many thousands of parts.

PACKED, DESPATCHED AND DELIVERED

Utilising our bespoke inventory management system, we ensure your products are packed and despatched, reaching their destinations swiftly and efficiently. With a number of logistics partners, ASL can despatch 'same-day' all over the globe to our international customer base.

/ REPAIR SPECIALISTS

With many years overhauling, repairing and re-certifying components, across a multitude of platforms, we are fully qualified and accredited to support all of your mechanical and electronic repair requirements.

Delivering a diverse range of repair solutions results in a reduction of administrative burdens and ultimately a reduction in turnaround times, keeping your assets operational. We continue to grow our network of strategic partners to improve the quality and breadth of repair services provided, striving to deliver our through-life support promise to our customers.

MECHANICAL

Repair and Overhaul: With considerable experience and knowledge of repairing aircraft components, we have built comprehensive in-house and partnered capabilities with the OEM and approved MRO vendors. We are able to deliver a range of repair solutions, which in turn reduces administrative burdens and ultimately a reduction in turnaround times, keeping your assets fully operational.

Support Services: With an extensive range of capabilities over a multitude of platforms, we offer solutions tailored to customers' requirements, offering complete flexibility to reduce costs and improve turnaround times.

PROVIDING YOU WITH THROUGH-LIFE SUPPORT
FOR TOTAL PEACE OF MIND.

Encompassing fabrication, machining, surface preparation, localised surface treatments, surface finishing, complete assembly and test, we serve some of the most prestigious global organisations across many Air, Sea and Land operators.

ELECTRONIC

Repair: Utilising OEM functional tools and advanced in-house techniques we are able to accurately identify defective components and systems. This approach ensures nearly all electronic circuits can be supported.

Obsolescence: During the product life cycle electronic circuits degrade and become unreliable, intermittent and often failures are not identified.

Our electronic LRU and PCB review programme predicts and identifies common and expected faults utilising system tools and knowledge gained from extensive experience in this specialised field.

Manufacture: Whether through obsolescence or supply chain restrictions, PCBs can suffer from degradation and become depleted. We provide a smallbatch electronic manufacturing solution, working in partnership, to your approved designs, to ensure system integration and reliability within the main system assembly.

/ LEGACY EXPERTISE

For many years we have worked with customers around the world to keep their assets operational. Preserving the lifespan of more mature fleets requires a unique blend of expertise and knowledge. With this combination of talent, we have delivered sustainable through-life solutions for a number of aircraft and land platforms, and with a structured strategy it is possible to mitigate most risks. Our experience at ASL affords us the ability to identify obsolescence risk at the earliest stage and then mitigate the risk with our extensive stock and customised obsolescence management programme.

We offer a highly skilled service for the maintenance and life extension of high and low value LRUs. We extend the life of LRUs, systems and components through routine overhaul, repair, re-certification and small batch production solutions, to your approved standards.

With proven expertise in the development and execution of end-of-life strategies, we work with you to extend the return on your investments. Working with our valued customers we provide a robust strategy to manage a variety of requirements. With key investment and focus on legacy procurement we provide turnkey solutions to extend the life cycle of your assets.

Our triple suite of 'AS' approvals is testament to our commitment to providing through-life support giving you total peace of mind.

/ WHY ASL

/ GLOBAL REACH

With customers located around the globe, ASL employs an integrated approach to total platform support. Our Head Office in the United Kingdom, and our international offices, serve customers (operators, end users, maintenance organisations, contract holders) in the Middle East, Asia, Oceania, United States, Europe and South America.

/ PROVEN EXPERTISE

ASL are well established, our disciplines divide into Component Supply, Repairs Solutions and Legacy Expertise, and with our customers coming from Air, Sea and Land operations. From spares and components, electronic and mechanical engineering to repair & overhaul services, ASL will support you via its dedicated team of experienced individuals who all have superior levels of industry and product knowledge.

/ EXPERIENCE

Many years of experience supplying, sourcing and repairing equipment and components has resulted in superior levels of industry and product knowledge. Our dedicated team are ready to rapidly respond to ensure through-life support, regardless of platform type.

/ QUALITY APPROVED

We continually strive to enhance our systems and processes, and the associated certifications are testament to quality management. Complying with a range of accreditations, ASL have the proven skills to supply, source, overhaul, repair, re-certify, manufacture, develop test and control functionality for a diverse range of equipment.
