

SPECIALIST MILITARY STOCKIST

Originating from an Anglo-French agreement in the late 1960s, the Lynx has gone on to become one of the most advanced and successful shipborne helicopters operated in the world today.

Aerospace Logistics Ltd (ASL) has over the years built up an impressive list of spares covering all disciplines on this fast and agile platform. Whether it is used in the Anti-Submarine, Anti-Ship, Utility role or as a rescue helicopter, we have an impressive array of parts and are able to support your needs covering all varieties of components. A great deal of our stock is Ex-Royal Navy and is in New/New Surplus condition. Many items are Airframe/Fuselage spares and still housed in their original boxes. ASL are already providing spares support to many existing operators in Asia, Europe, the Far East and South America. Airframe Structural parts in stock are applicable to the original Navy Lynx and the Super Lynx 300.

As well as airframe components we have many Avionic, Engine, Gearbox, Hardware, Rotors (Main & Tail) and Undercarriage and a host of OEM equipment, all housed in any one of our warehouse locations near our headquarters in West Sussex which is conveniently positioned near London Gatwick Airport.

The Lynx helicopter is yet another UK platform that ASL has for many years specialised in with our overseas clients, providing spares support, repair and overhaul programmes.

The Lynx joins our other core aerospace products and works in perfect symmetry alongside our AV-8B (Harrier), Hawk, Jaguar and Sea King spares.

WHY ASL

ASL are experts in supplying, sourcing and repairing equipment and components. 100,000 sq.ft of fully stocked warehousing comprising over 500,000 lines of components, and many millions more available through a global supply chain network, ASL provides its customers with through-life support for your total peace of mind.

/ GLOBAL REACH

With a Head Office in the United Kingdom, international offices and a global customer base, ASL employs an integrated approach to total platform support.

/ PROVEN EXPERTISE

From spares and components and electronic engineering to repair & overhaul and mechanical engineering, ASL will support you via its dedicated team of experienced individuals.

/ EXPERIENCE

Many years of experience supplying, sourcing and repairing equipment and components has resulted in superior levels of industry and product knowledge.

/ QUALITY APPROVED

We continually strive to enhance our systems and processes, and the associated certifications are testament to quality management.
